

Contact Web Cleaner

CWC-S, CWC-D

Improved Quality

– With KELVA's Contact Web Cleaner, CWC

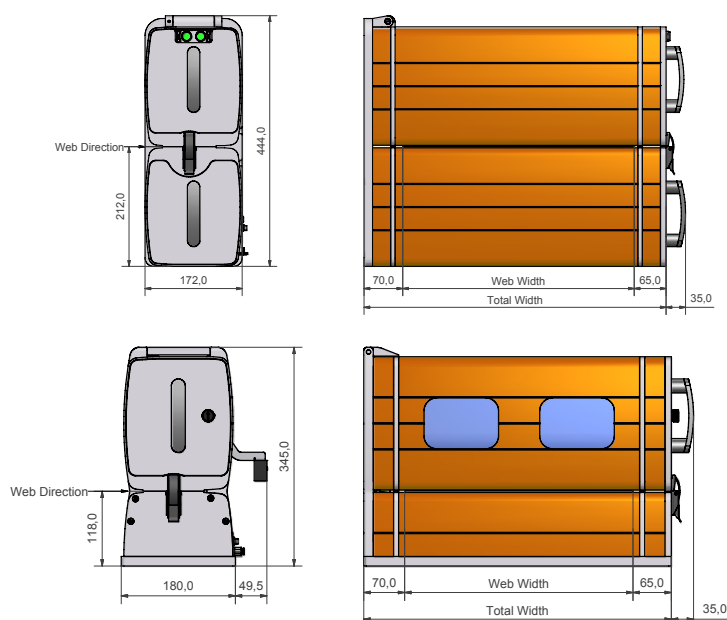

- Reduces contamination up to 98 %
- Polymer roller makes very good contact with the web - even at low pressure
- Available for single or double sided cleaning
- Low-silicone polymer roller

KELVA Contact Web Cleaner is suitable for web speeds up to 400 m/min, from 250mm to 650mm. It has crocodile opening to allow easy web threading and continuous cleaning while changing adhesive rolls. The static discharger prevents the web from reattracting dust after cleaning.
